## CD209 / DC-SIGN Monoclonal Mouse Antibody (C209/1781)

## **Product Description**

DC-SIGN is a transmembrane receptor that is expressed on the surface of dendritic cells and macrophages. It is involved in the innate immune system and recognizes numerous evolutionarily divergent pathogens ranging from parasites to viruses. The protein is organized into three distinct domains: an N-terminal transmembrane domain, a tandem-repeat neck domain and C-type lectin carbohydrate recognition domain. The extracellular region consisting of the C-type lectin and neck domains has a dual function as a pathogen recognition receptor and a cell adhesion receptor by binding carbohydrate ligands on the surface of microbes and endogenous cells. The neck region is important for homo-oligomerization, which allows the receptor to bind multivalent ligands with high avidity.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

**Stock status:** Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1781, Anti-CD209 (C209/1781)

## Oradust attributes

Product attributes			
Antibody number	#1781		
Antibody reactivity (target)	CD209, DC-SIGN		
Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	C209/1781		
Isotype	IgG2b, kappa		
Molecular weight	45 kDa		
Synonyms	CD209; CDSIGN; CIRE; CLEC4L; DC-SIGN; DC-SIGN1; DCSIGN; Dendritic cell-specific ICAM-3 Grabbing Non-integrin 1; HIV GP120 Binding Protein; SIGN-R1; SIGNR5		
Human gene symbol	CD209		
Entrez gene ID	30835		
SwissProt	Q9NNX6		
Unigene	278694		
Immunogen	Recombinant human CD209 protein fragment		
Verified antibody applications	IHC (FFPE) (verified), WB (verified)		
Antibody target cellular localization	Plasma membrane, Secreted (extracellular)		
Species reactivity	Human		
Antibody application notes	Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM Tris with 1 mM EDTA pH 9.0 for 10-20 min followed by cooling at RT for 20 min, Immunohistology (formalin) 0.5 ug/mL, Flow Cytometry 0.5-1 ug/mllion cells/0.1 mL,		
	Immunofluorescence 1-2 ug/mL, Optimal dilution for a specific application should be determined by user		
Positive control			
Positive control Shipping condition	application should be determined by user		
	application should be determined by user  THP-1 or HeLa Cells. Small Intestine, Uterus or Lymph Node.
